About Me

I'm currently pursuing B.Tech in Computer Science from Lovely Professional University. With certifications in Penetration Testing, Vulnerability Analysis, Threat Intelligence Analytics, Counter Intelligence and a strong foundation in multiple programming languages, I am eager to apply my knowledge and skills toward a meaningful career. I am looking forward to working in a challenging environment that enables me to grow and develop my skills further.

Projects

Working Magic Matrix

19/10/2022 - Present

In this project, I have created a magic matrix in which the sum of all elements from every direction is equal to 15 and I have used python modules and definition functions in it.

Website Security and construction

14/12/2022 - Present

In this project I have created a secured website with help of two of my team members, this site includes HTML, CSS, and JAVASCRIPT.
